Malaya Company

The login screen will be prompted again for user to log in with new password

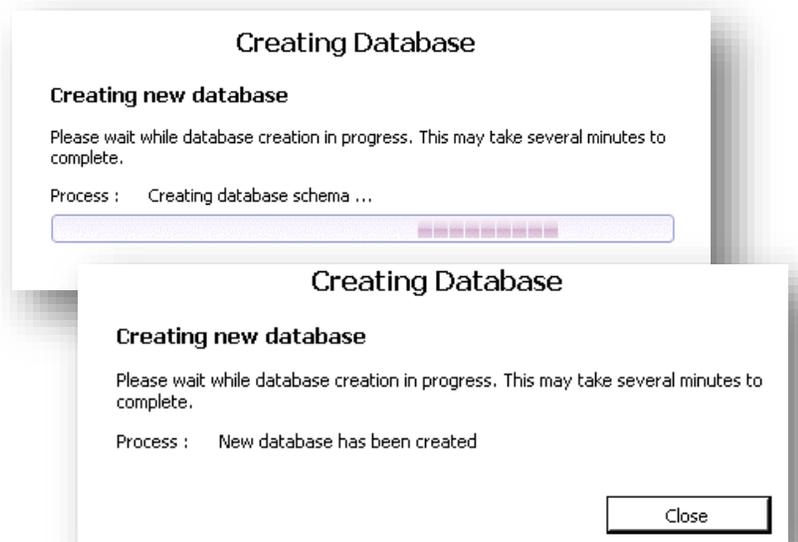

At this point where the software license not been activated, the License **Notification** screen will prompted:

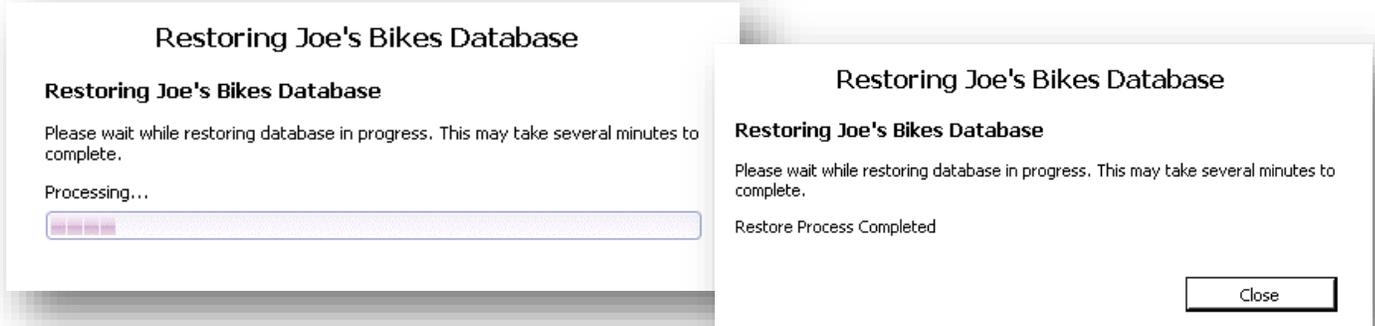

- Click **Continue** Trail button for trial use of the system for a maximum of 14 days or 100 transactions, whichever comes first.

**Note:** This option will not be prompted once the software license is activated

- As this is a new installation, the system will proceed to create a new database for the default demo company, “Joe’s Bikes”, for your evaluation, learning and experience

Then, the data of Joe's Bike will be restored accordingly for you to explore.

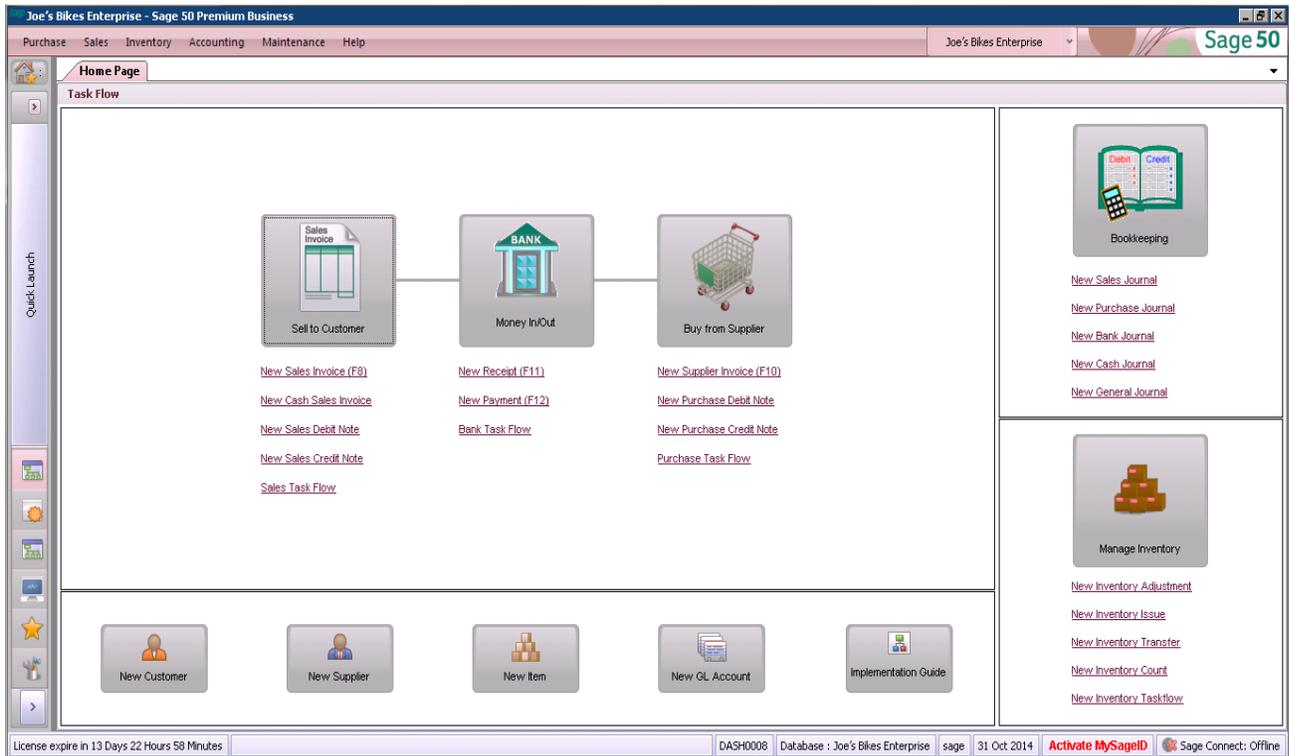

Upon completion of the data restoration, Login screen will be re-appear again. Please login into the system.

The default demo company "Joe's Bikes" will be listed in the Company List.

- Click **Open** button to log in to the company to start your evaluation, learning, and experience

This is initial **Home Page** you see when you log into **Sage 50**.

**IMPORTANT NOTE:** You need to activate with validate Sage 50 Multi-user's license only can continue to install the Client version. Please refer to "**License Activation.pdf**" documentation for instruction.

## Enabling Firewall for Inbound at Server Level

You need to enable the firewall setup. Yet you must have full administrator right to do it.

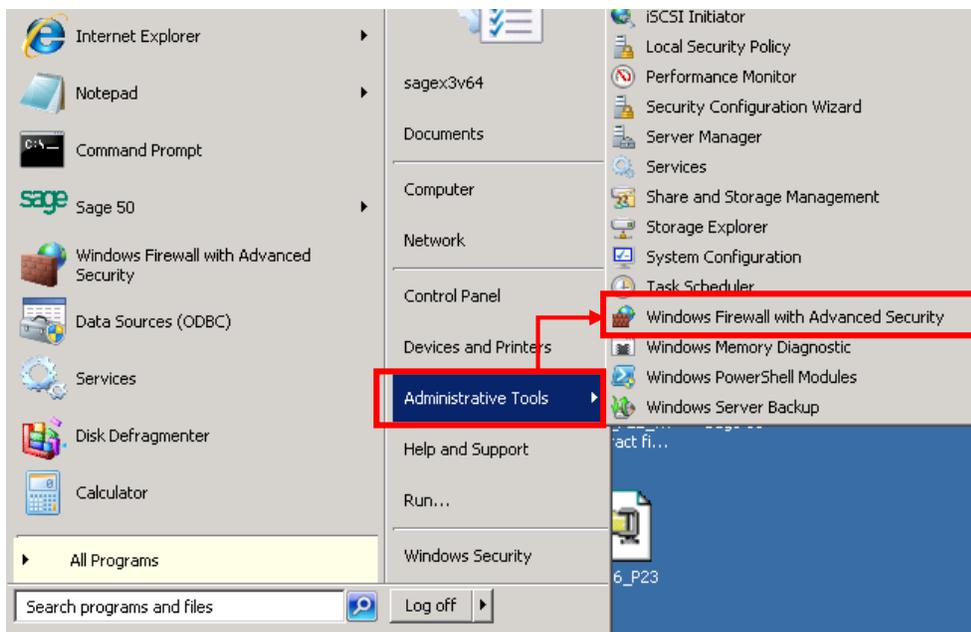

For **MySQL** C:\Sage\MySQL Server 5.5\bin\mysql.exe

For **MySQLD** C:\Sage\MySQL Server 5.5\bin\mysqld.exe

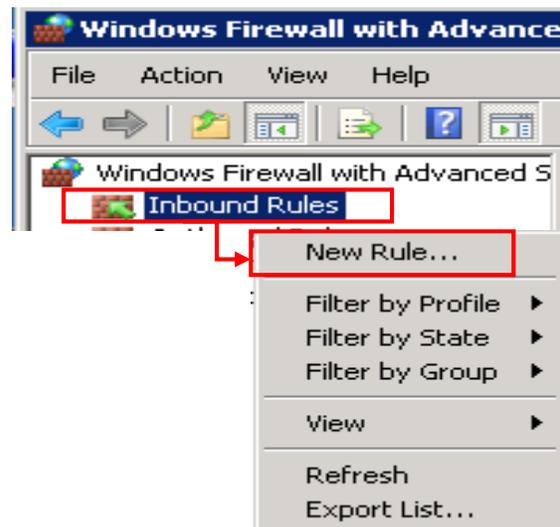

[Illustration for Window Server 2008 R2](#)

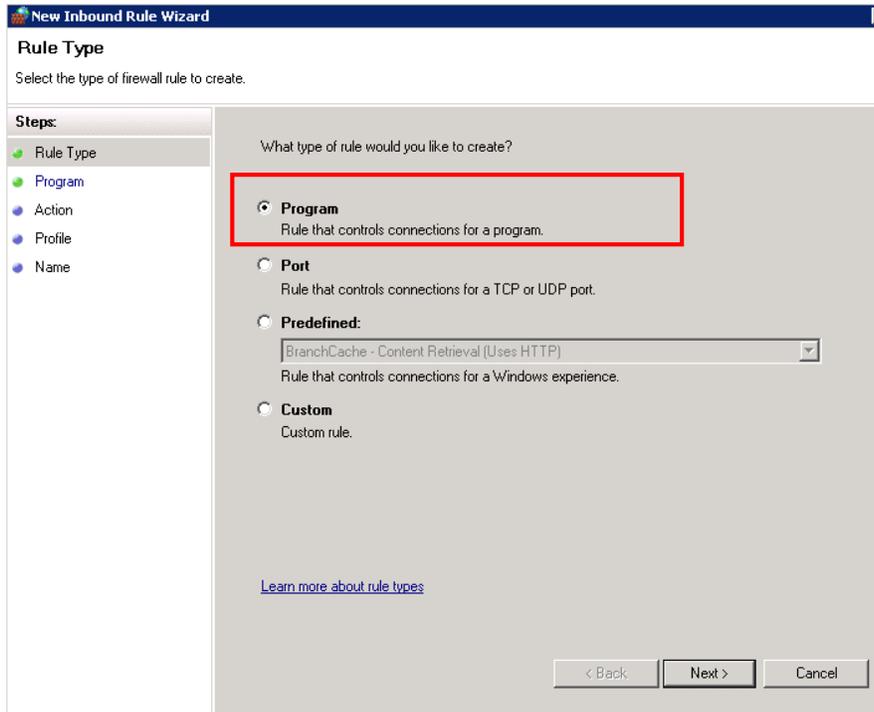

[Creating New Inbound Firewall security for MySQL](#)

Click **Start >> Administrative Tools >> Windows Firewall with Advanced Security**

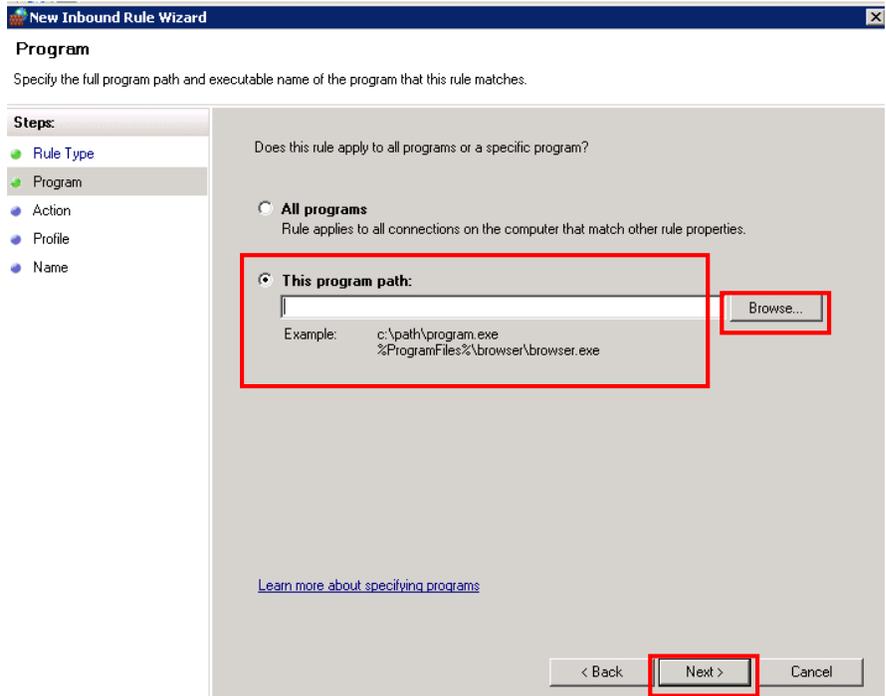

- Click on **Inbound Rules**
- Right Click **New Rules**

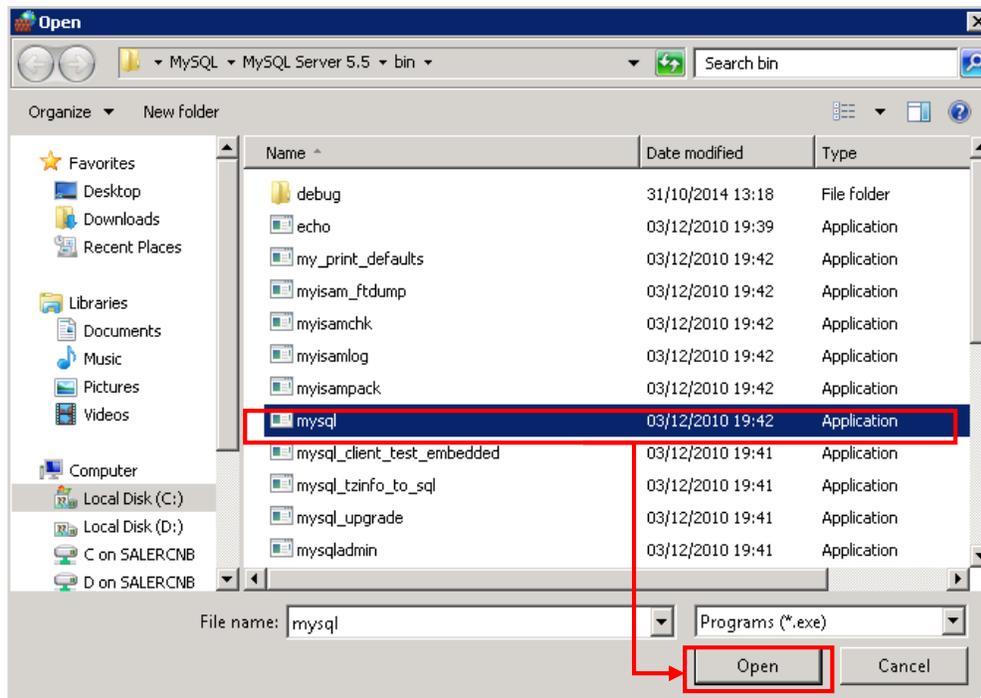

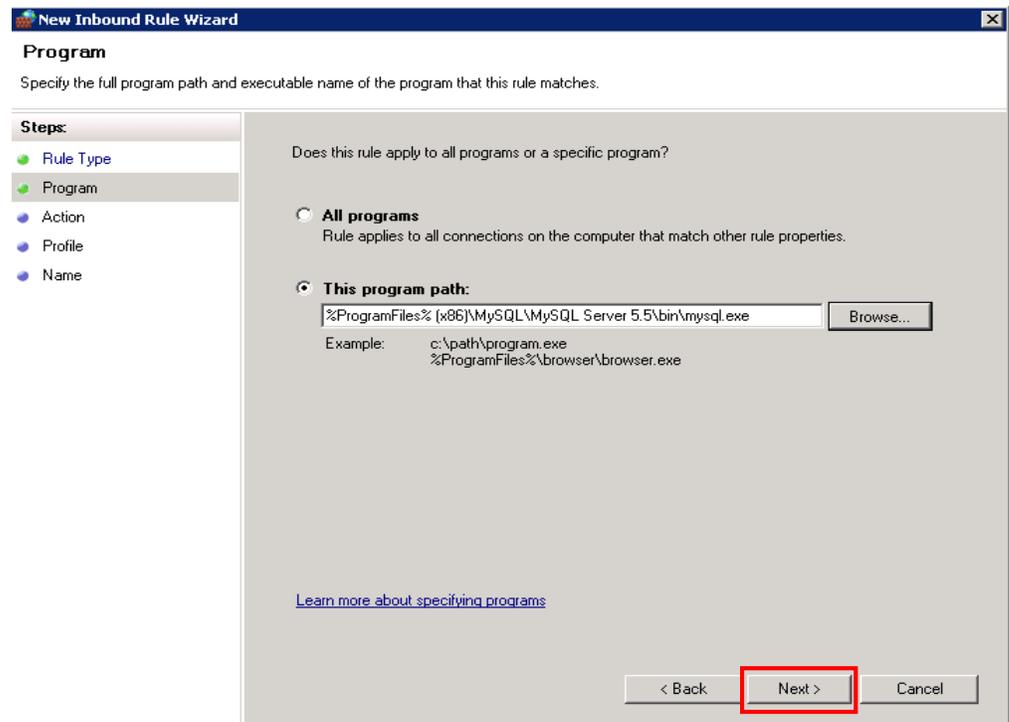

- Select **Program**
- Click **Next**

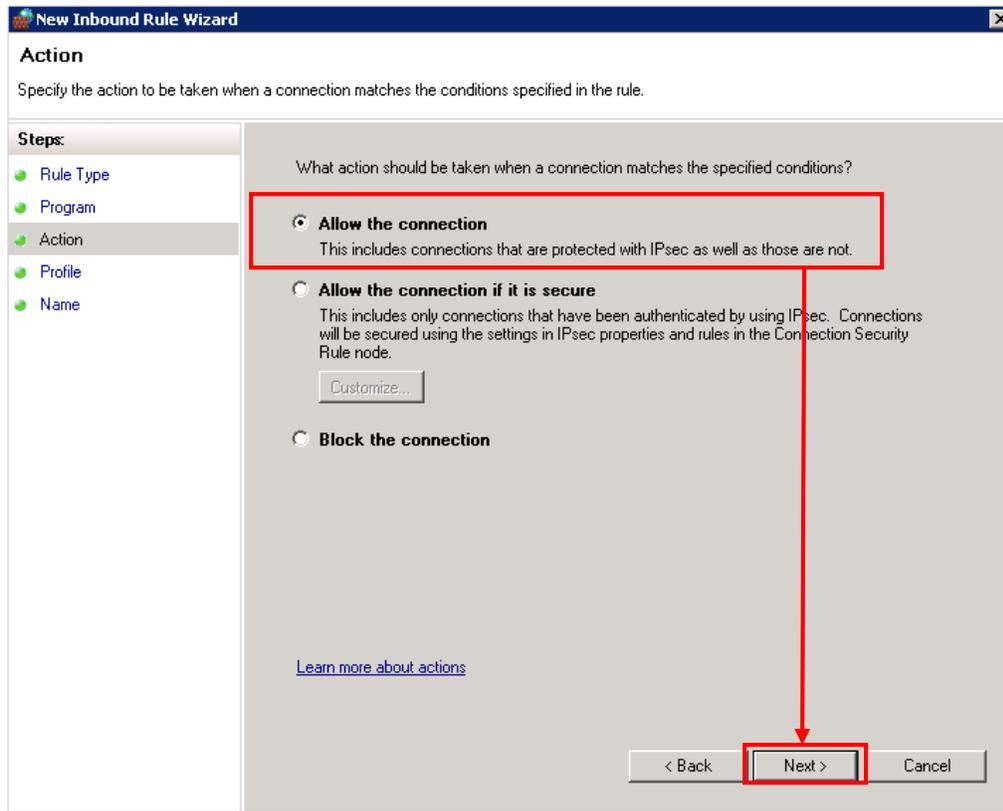

Select **This Program path:**  
Click **Browse** button

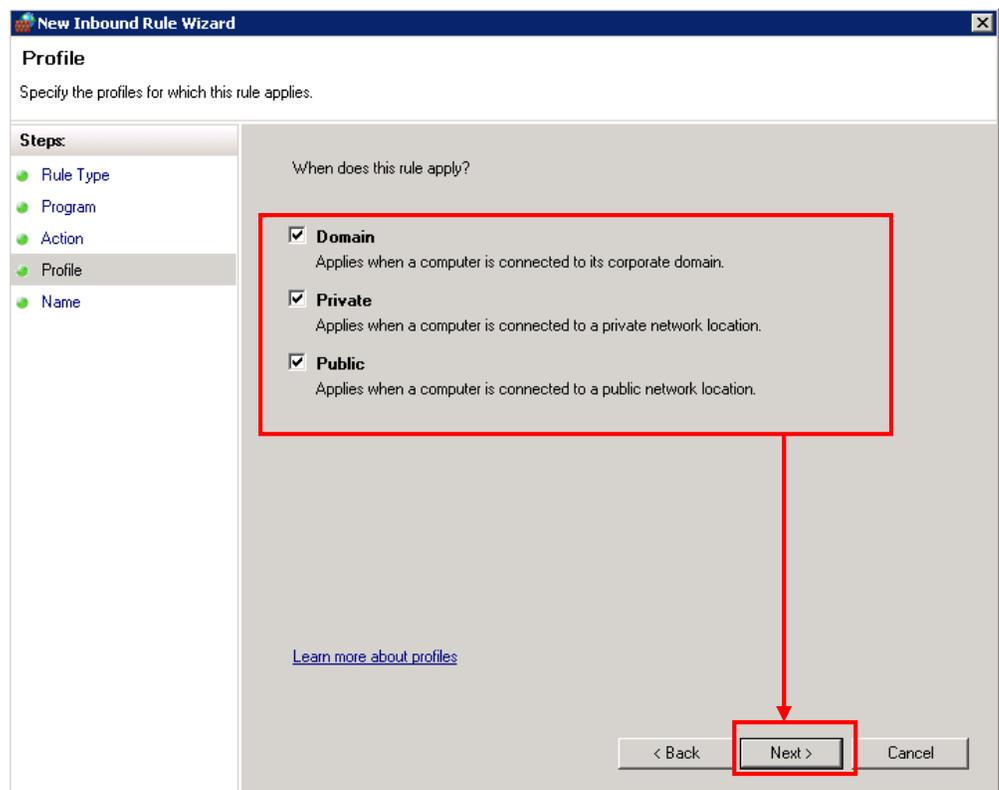

- Find the MySQL program file  
e.g. C:\Sage\MySQL Server 5.5\  
bin\mysql.exe
- Click **Open**

- Click **Next**

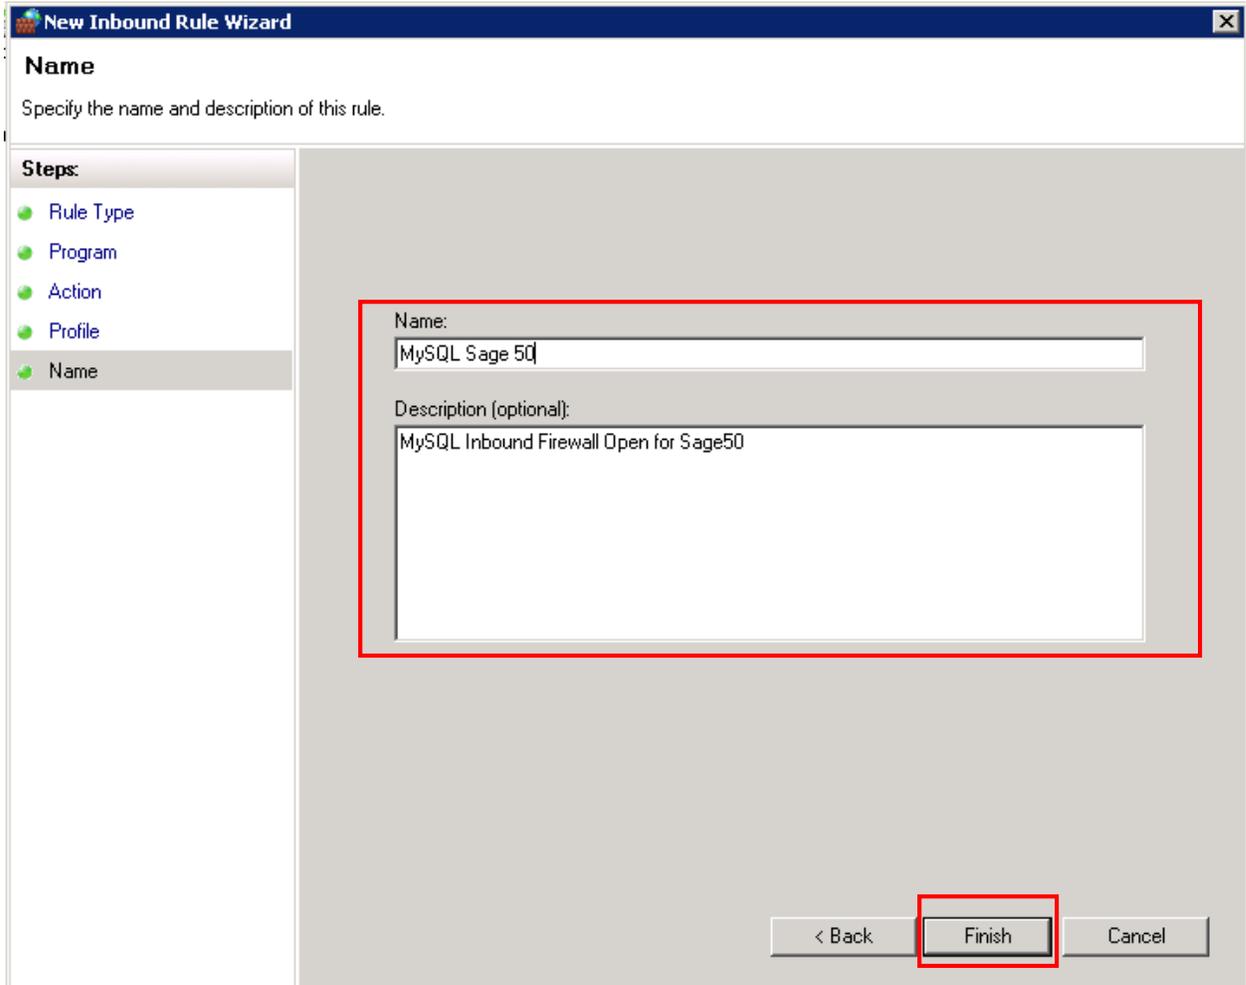

- Select **Allow the connection**
- Click **Next**

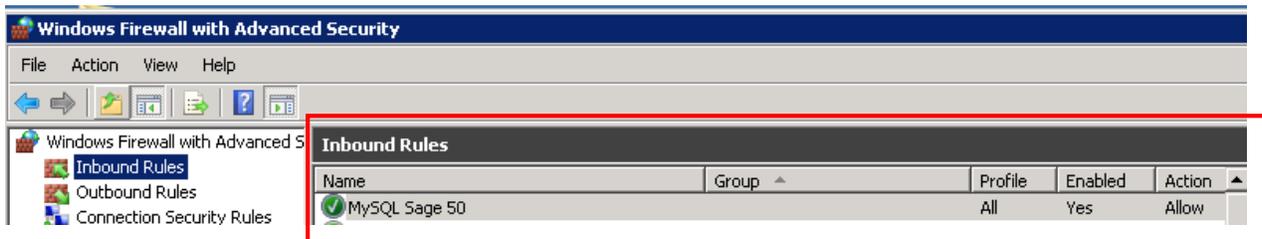

- Ensure the checkbox for **Domain**, **Private**, and **Public** is checked
- Click **Next**

Please provide the Name for this **New Inbound Rule Wizard** and **Description** for your reference and trace. Then click **Finish**.

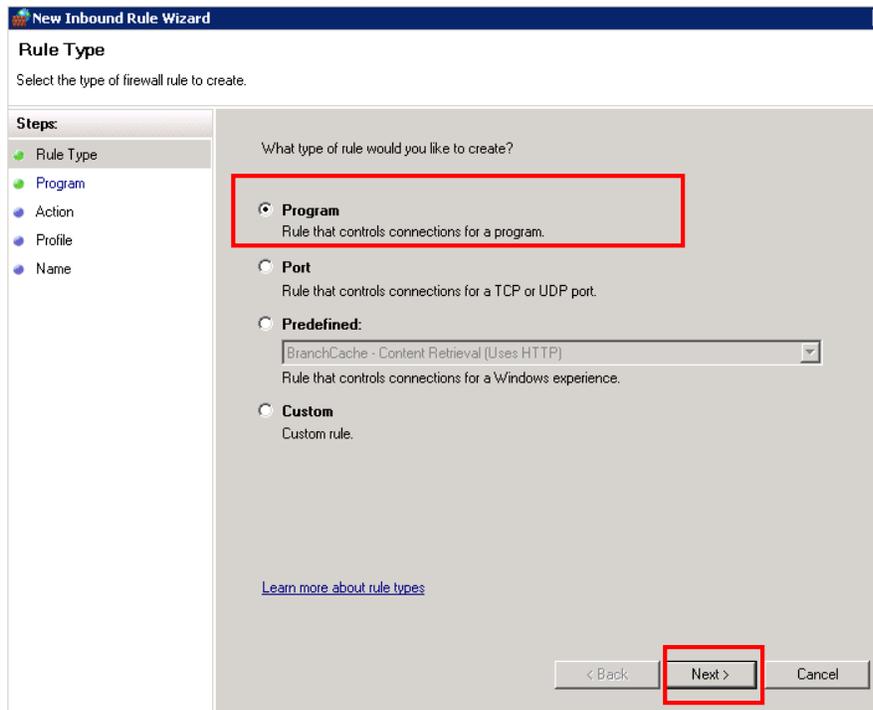

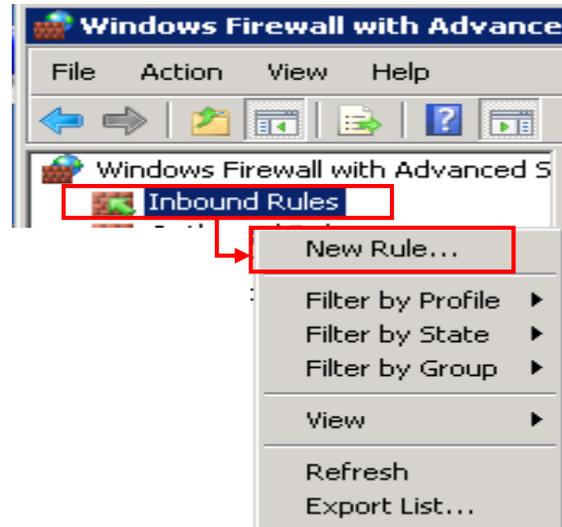

Once it done, you can see **MySQL Sage 50** Inbound Rules is listed.

## Creating New Inbound Firewall security for MySQLD

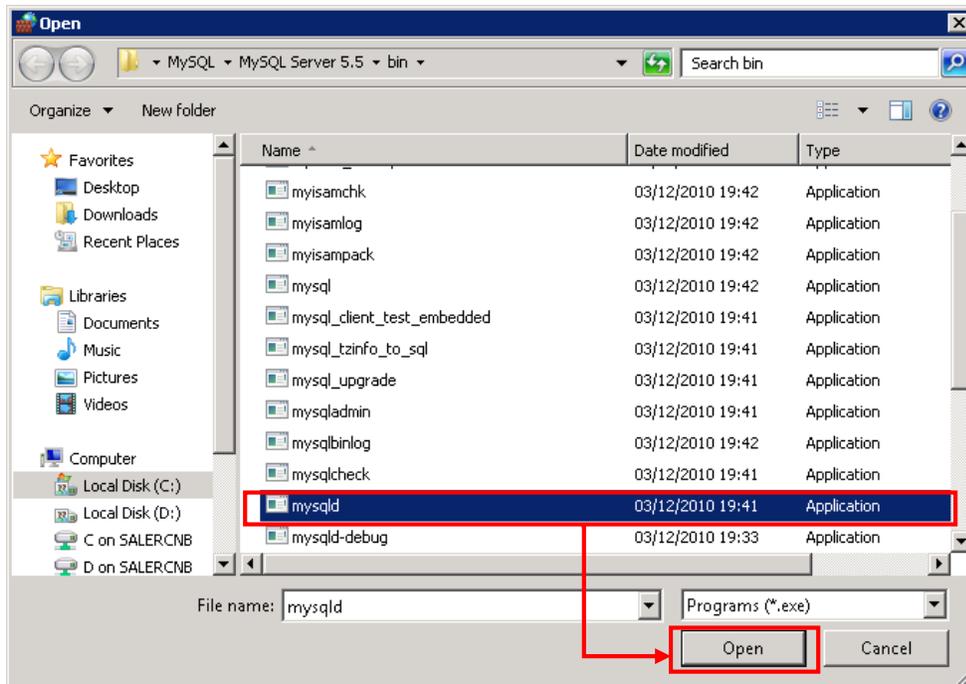

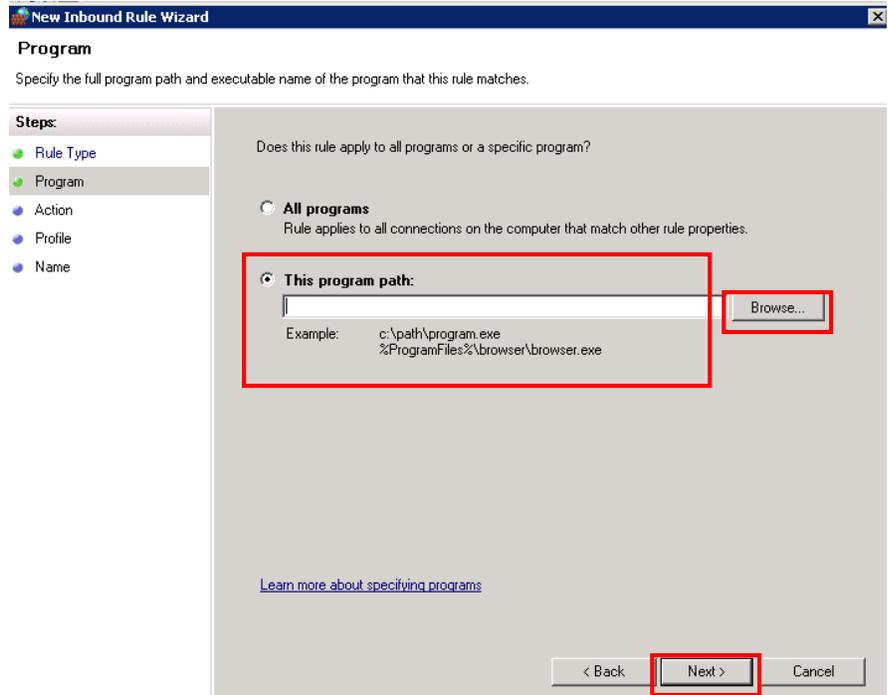

You need to repeat the same steps on **MySQLD** same as **MySQL** above.

- Click on **Inbound Rules**
- Right Click **New Rules**

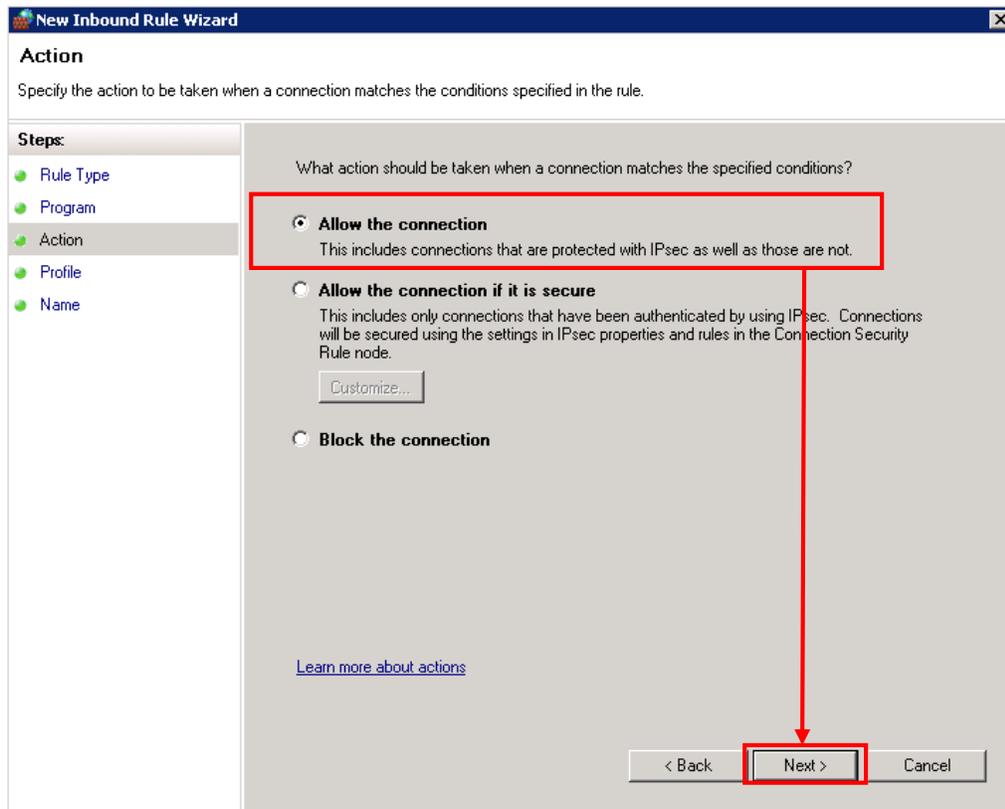

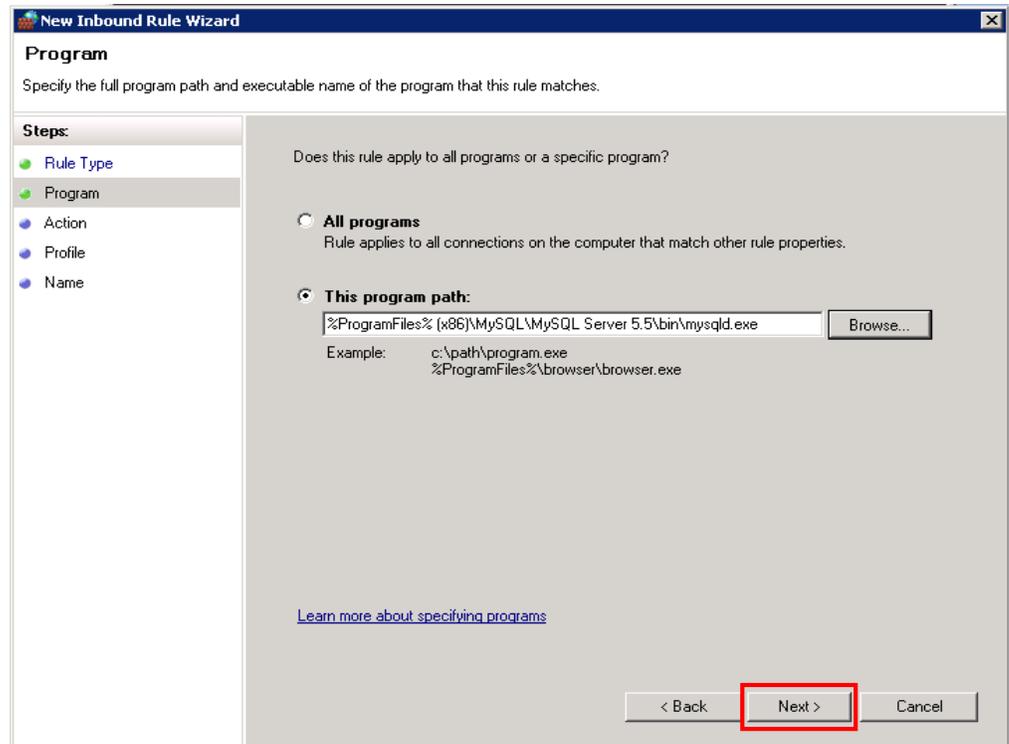

- Select **Program**
- Click **Next**

Select **This Program path:**  
Click **Browse** button

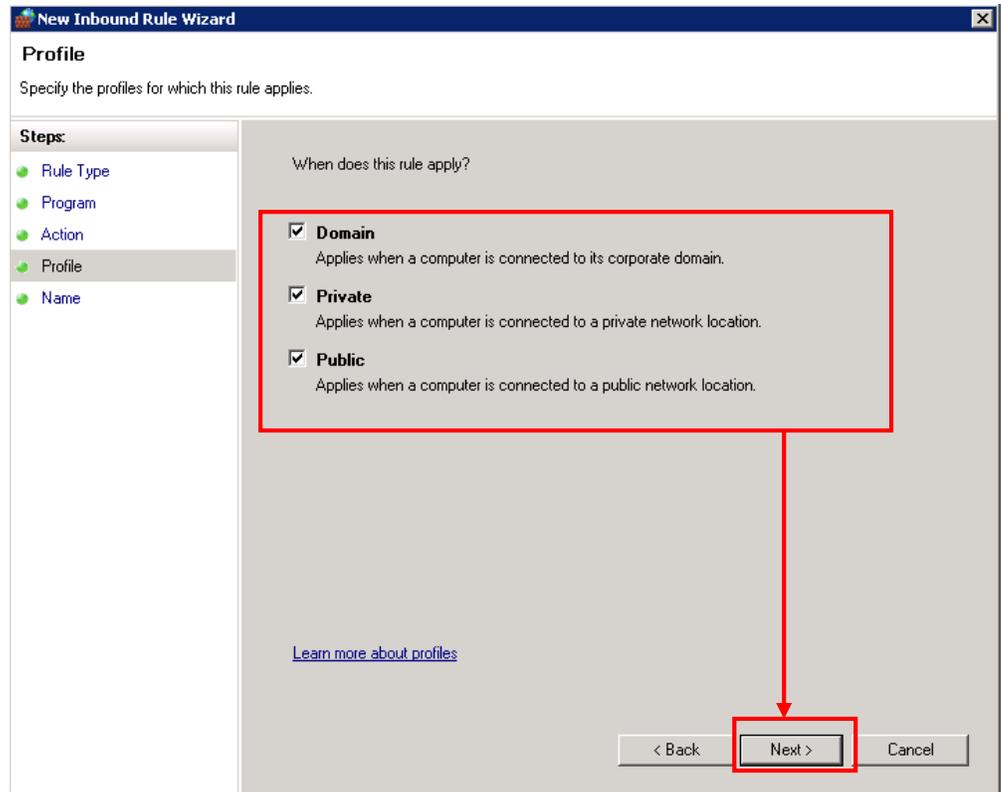

- Find the MySQL program file  
e.g. C:\Sage\MySQL Server 5.5\  
bin\mysqld.exe
- Click **Open**

- Click Next

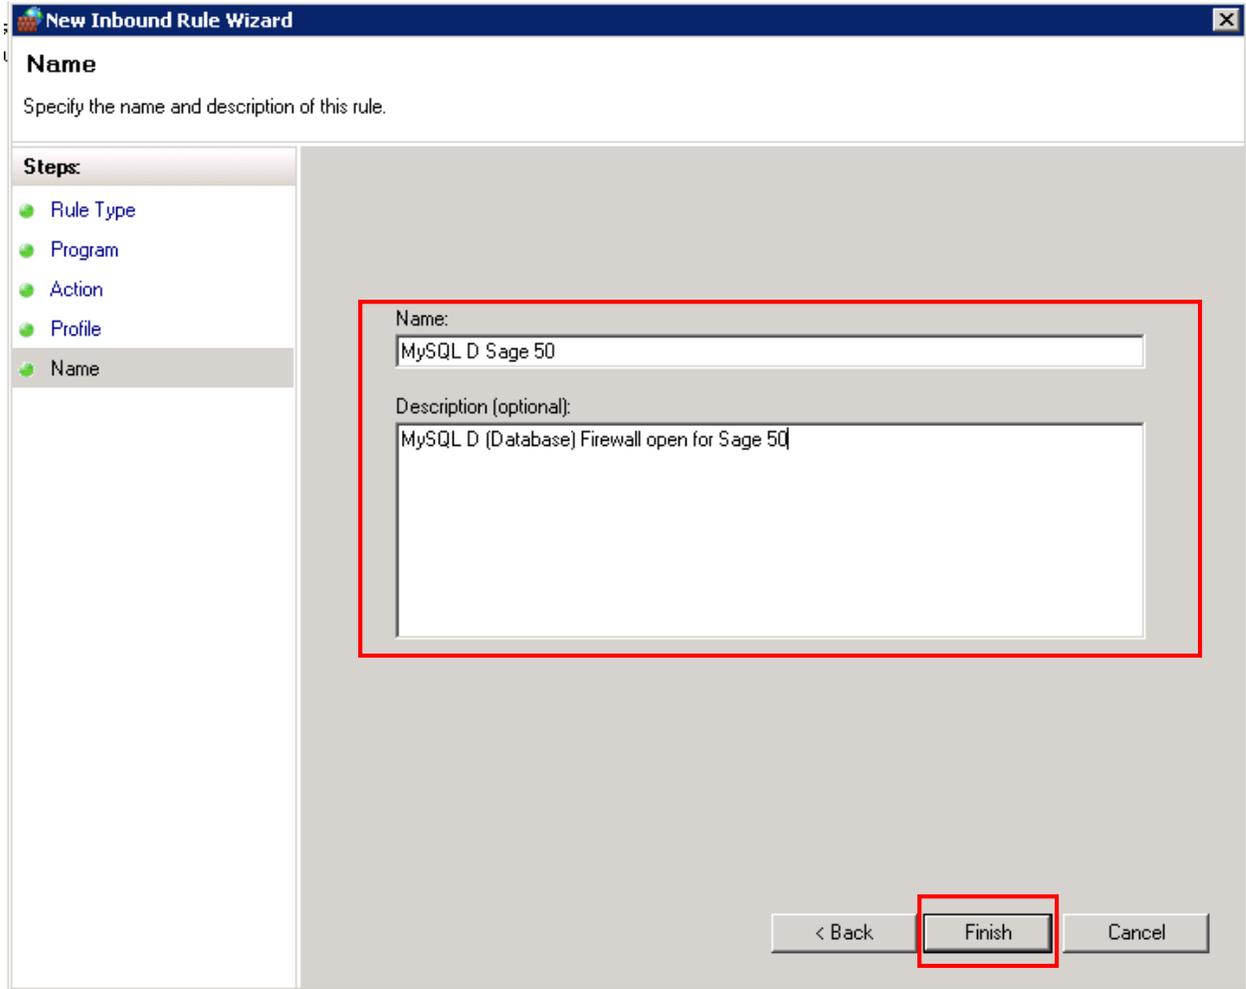

- Select Allow the connection
- Click Next

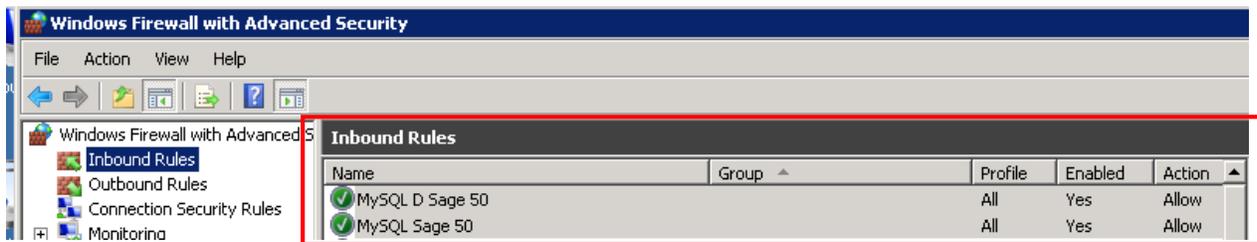

- Ensure the checkbox for **Domain**, **Private**, and **Public** is checked
- Click **Next**

Please provide the Name for this **New Inbound Rule Wizard** and **Description** for your reference and trace. Then click **Finish**.

Once it done, you can see **MySQL D Sage 50** Inbound Rules is listed.

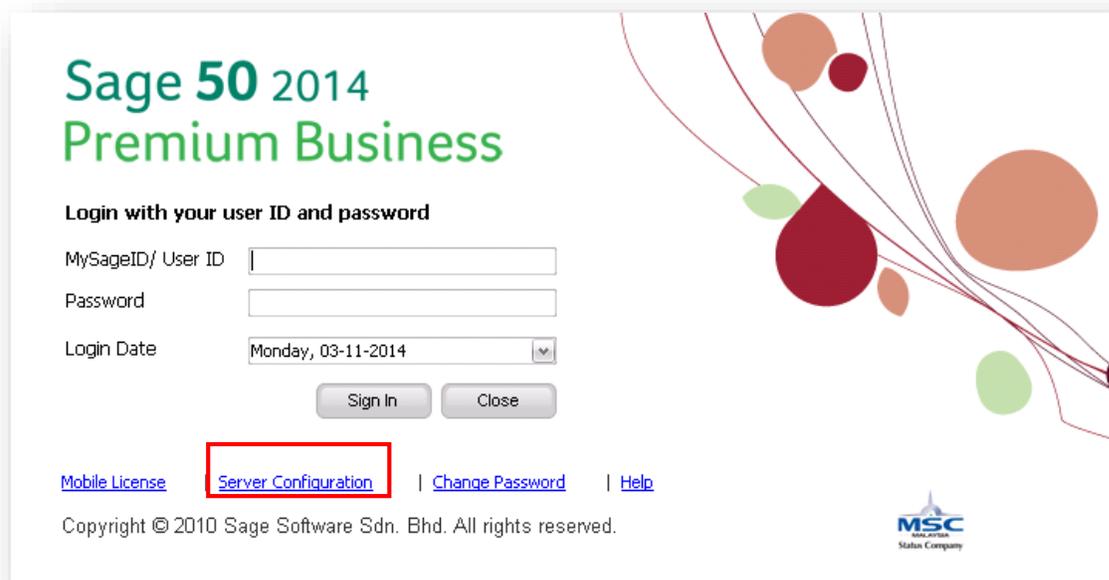

## Set your Sage 50 Configuration as Server Environment

Step 1:

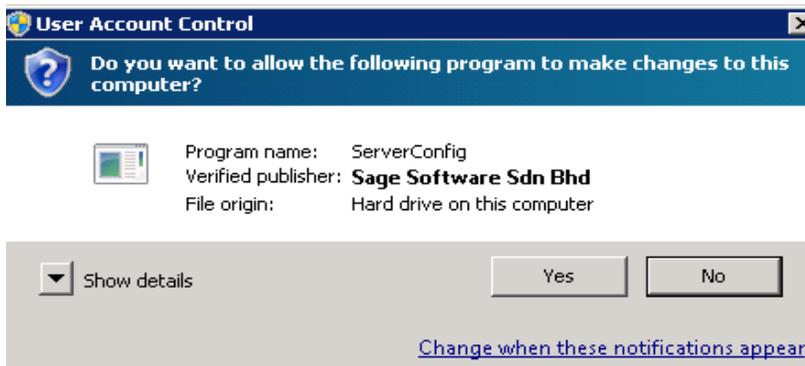

Lunch your **Sage 50**

Step 2: Click on **Server Configuration**

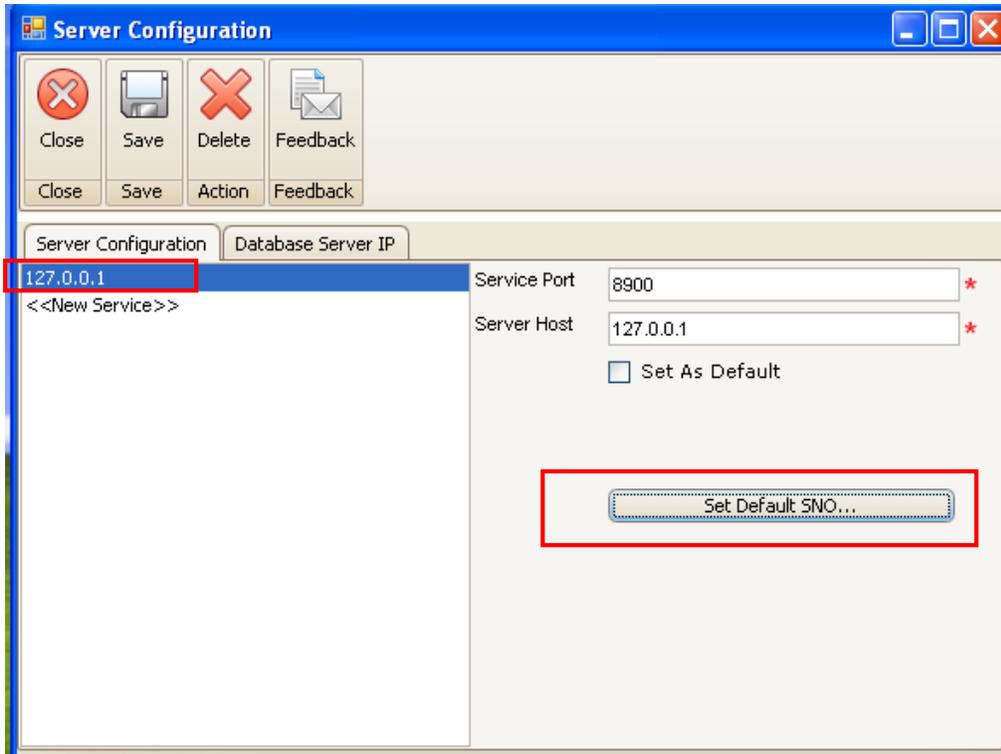

Step 3: Click **Yes** if you see this message box for **User Account Control**. If you didn't see that is fine and you can ignore this step.

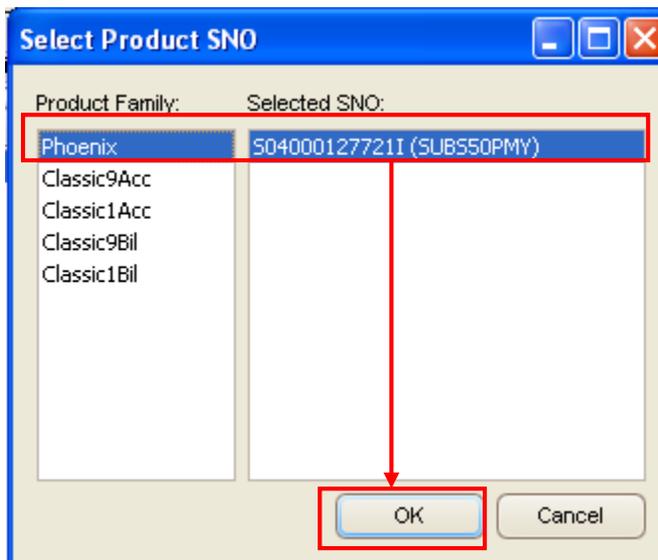

**\*\* IMPORTANT NOTE:** Before running subsequent steps you need to activate your multi-users license for Sage 50.

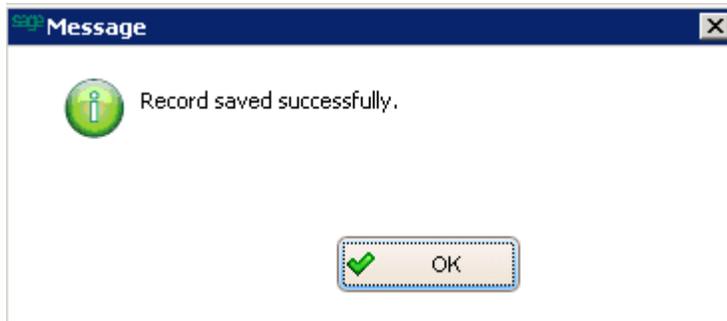

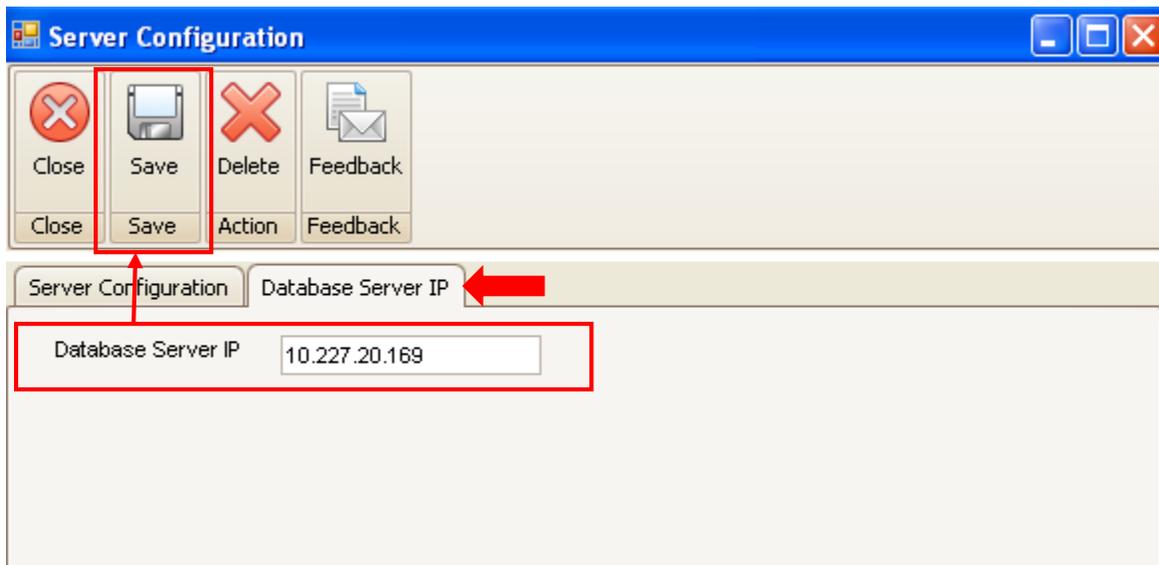

Step 4: Click and focus on **127.0.0.1** and then Click **Set Default SNO...**

Step 5: Select **Phoenix** for Product Family and it will select your registered license **SNO** then click **OK**.

Step 6: click on **Database Server IP** tab and ensure your IP is registered. Once done, click **Save** button.

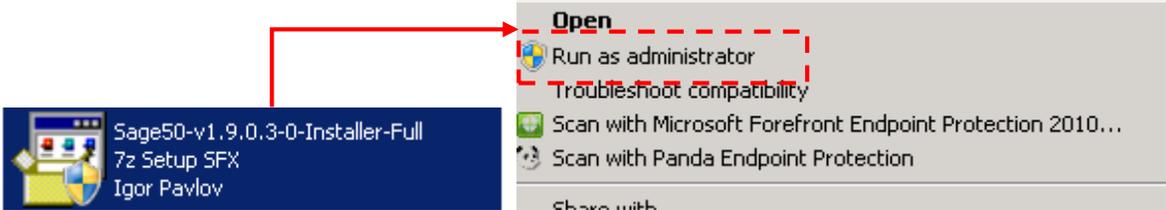

## Client Environment

Have the system up and running with just 10 simple steps using the Installation Wizard:

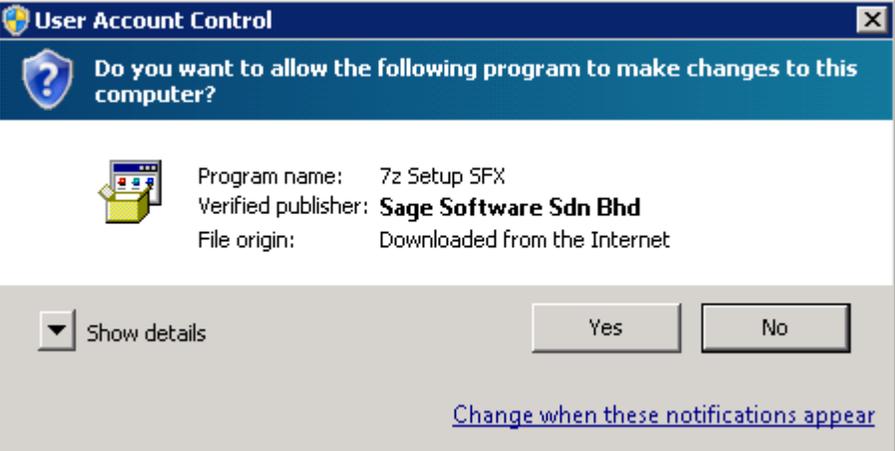

Step 1: Download the installer from the website <http://sage50.sage.my/index.php/where-to-learn/product/sage-50-2015>

Step 2: Right – click on the installer icon and select “Run as administrator” to launch and extract the installation file. (\*\*Note: Ensure you are server administrator with full administrator right.)
